

## Bird Proof Gel

See website for current pricing.

**Non-toxic, tacky bird repellent gel.** Can be used on ledges, sills, beams, rafters, signs, statues and hundreds of other outdoor surfaces to prevent pest birds from roosting. The gel does not harm birds – it simply makes surfaces uncomfortable, intimidating and uninviting. **USE AS DIRECTED.**

- **Discreet** / nearly invisible – great for high-profile applications
- **Cost-effective**, simple bird control method
- **Lasts for about a year** on average, depending on area conditions

If birds see Bird Proof Gel, they are not likely to land upon it. If they do land, they will find the sticky surface to be uncomfortable and won't stay for long. They learn over time and do not return to the treated surfaces.

### Customer Testimonial

**This unsolicited testimony of extreme satisfaction for your product "BIRD PROOF GEL REPELLENT"** is not intended to be patronizing. However: when you come across a product that is new to you and does what it says, you become overwhelmed and want to tell the "whole world". Your Gel Repellent was applied over a year ago and shows no sign of deterioration and best of all the birds (mostly big ravens and terns) no longer come near our building.  
–Leroy, O.

### Details

- Applies easily to any ledge or landing surface
- Minimal upkeep required – gel remains effective for up to a year!
- Low-profile and discreet
- Birds learn over time not to return to locations that have been treated with Bird Proof Gel

### Applications

Repels pest birds including pigeons, starlings, house sparrows and more. Effective coverage: 10 linear ft. per tube (case of 12 covers 120 linear ft.) Recommended for use on any surface birds can land on, especially high-profile surfaces where aesthetics are a priority:

- Windowsills & ledges
- Rafters, beams & poles
- Signs & statues
- Chimneys & pipes
- Air conditioners & other equipment
- Etc.

### Benefits

- Cut recurring cleanup and repair costs
- Protect rooftops, walls, equipment and vehicles from corrosive bird droppings
- Reduce health and liability risks associated with pest bird infestation
- Prevent the spread of diseases such as West Nile, Salmonella, and E. Coli
- Eliminate fire hazards caused by birds building nests in vents and chimneys
- Avoid government and safety inspection failures
- Increase/maintain property aesthetics
- Decrease nuisance for residents, workers, customers, etc.
