

## Gator Guard

See website for current pricing.

Keep birds away from lakes, ponds, golf courses, pools and more with a **realistic, floating, moving predator alligator head.**

- Mirrored-back eyes flash in the sun, intimidating pest birds
- Gator moves and bobs with the wind and water, appearing lifelike
- Effectively scares geese and other waterbirds

Gator Guard can be used in many applications and the realistic design makes it an interesting and attractive addition to your landscaping!

### Customer Testimonial

***I bought the Gator Gard after losing half my Koi from our pond.*** This thing has saved my fish. Not only has it saved my fish, but keeps the ducks and heron and any other large birds from my property and above ground pool ever since. I let it float on the water and the water is always moving via the waterfall or the fish swimming.

–Mick R. from Point Pleasant, NJ

### Details

- Floating predator replica
- 25 threatening inches long
- Moves and bobs with the wind and water
- Life-like eyes flash in the light
- Effective worldwide – even where alligators don't live – as this fear is instinctive, not learned
- Waterproof, weather proof, no sun fade

### Applications

Repels pest birds including geese, ducks and other waterbirds.

Effective where visible up to one acre.

Recommended for use in small bodies of water with the following applications:

- Lakes, ponds, koi ponds & pools
- Golf courses & parks
- Corporate grounds, hospital grounds & school campuses
- Homes, large estates & condo property
- Fish or shrimp farms
- Etc.

### Benefits

- Cut recurring cleanup and repair costs
- Save parks, yards, corporate grounds, pools, ponds, turf, etc. from bird damage
- Reduce health and liability risks associated with pest bird infestation
- Increase/maintain property aesthetics
- Decrease nuisance for residents, workers, customers, etc.
