
Scoot® Deer

KEEP DEER AWAY FOR UP TO 30 DAYS – EVEN IN RAIN

Organic Deer Repellent: Repel deer with a formula that tastes like hot sauce, encouraging them to feed on *other* trees and shrubs. The active ingredients irritate deer's senses without harming them. They'll stay away long-term: deer are highly intelligent – they'll associate the taste discomfort with feeding activities and the immediate area, and will find another feeding and hiding spot.

Food grade capsaicin pepper plus our unique addition of USP grade castor oil offers protection of up to 30 days, instead of reapplying every one or two days with other products.

MICROENCAPSULATED - time-release protection, so each day is as effective as day one
WATER-RESISTANT - effective after several waterings and/or rains

Application: Identify favorite feeding and hiding spots. Spray a heavy coat of Scoot Deer on the target area and all around it (all paths to area including shrubs, eating spots, and grassy areas). Deer competing for food take longer to train to stay away. Be persistent. The greater the demand for food, the greater your consistent treatment is needed.

98.9% ORGANIC

All ingredients in Scoot Deer are found on the EPA considered safe 4-A or 4-B lists.

Please note: This product cannot be sold to California customers.

#SD-QT Quart with Pump Applicator \$16.95

#SD-GAL Gallon \$49.00
