

**Dependable, Effective Bird Control for
FRUIT, RICE, GRAINS, SWEET CORN & SUNFLOWERS**

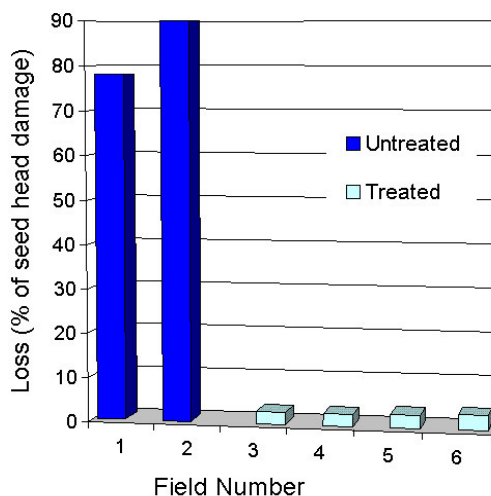

Bird Shield™ CROP PROTECTOR

Biodegradable

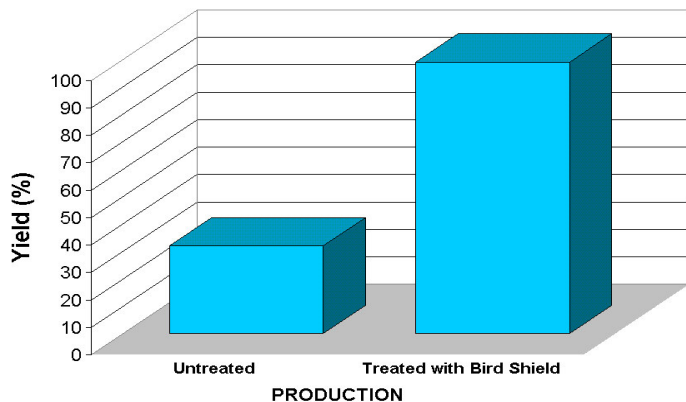

TASTE AVERSION:

Bird Shield is a food-grade bird repellent developed with major university assistance. It has been effectively used in all 50 states for corn, sunflowers, rice, fruit and turf and has recently been registered by the EPA for cereal grains including sorghum, millet and oats. The active ingredient is Methyl Anthranilate, a constituent of Concord grapes. MA has been used by the food and drug industry for more than 40 years to flavor candy, sodas, gums and drugs, and it is on the US Food & Drug Administration's "Generally Recognized as Safe" (GRAS) list.

Effect of Two Aerial Applications of One Pint of Bird Shield Repellent/acre to Reduce Blackbird Damage to Sunflower Seed.

Production of Sweet Corn with Bird Shield repellent

Don't let stubborn hungry birds destroy your crops or your income!

- Sweet Corn & Popcorn
- Field corn & all other specialty varieties
- Blueberries, Cherries & Table Grapes
- Rice, Apples & Sunflowers
- Peaches, Pears, Plums & Nectarines
- Sorghum, Millet & Oats
- Turf, Trees, Ornamentals, Structures and Non-Fishbearing Bodies of Water

Protect the visual appeal – the reality of any marketplace. Damage can happen overnight – don't lose money.

Birds leave treated areas for better food sources -- long-term – they can't habituate. Environmentally friendly product is EPA reduced risk, developed with major university assistance and FDA Generally Recognized As Safe. Made from a bitter tasting, smelly component of concord grapes (active ingredient methyl anthranilate).

Aerial application, 1 pint of BirdShield to 5 gallons of water per acre, when you first see birds or bird damage, and 7 days later if you see birds or damage again.

Price: \$95 per gallon. Call or e-mail for higher quantity prices, or for specific application information.
