Sirs:

We have had your Super Bird Expeller Pro installed on the primary clarifiers at our facility for over a year now and are very satisfied with the product. It has taken us this long to accurately evaluate the product because this has been a long-standing and reliable food source for these birds for many years and some of the more fearless ones were extremely reluctant to leave. I am very happy to recommend this product because we were delighted to find something that meets our environmental requirements and works as well. We are surrounded by houses and located on the Boise River Greenbelt path so we were precluded from using any noisy or lethal deterrent methods. The neighbors and greenbelt patrons who do notice the distress calls are more intrigued by the process than anything else when they are told what it is, and the employees don't even hear it anymore. Thanks again for making a dependable product that alleviates a very messy and annoying problem effectively and humanely. Feel free to use my name or to have people contact me directly.

Sincerely:

Jeff B
