**Message:**

*We have been using the Prowler Owl as part of the geese control program at our 42 acre campus setting R&D facility for about a year. The Prowler Owl keeps any geese from coming onto the lobby steps during off hours. This has kept the steps "dropping" free. The Prowler Owl can not be expected to cure the geese problem alone, but is a valuable partner with the border collie used 2 days a week and USDA egg control during mating season. Using this three-pronged approach our flock has gone from 300+ to about 25.*
