Subject: SuperBirdXPeller PRO

Bird-X,

Just wanted to drop a message to you regarding the Super BirdXPeller Pro that I purchased from you a few months ago. We have a couple of covered outdoor areas (attached pictures) that were the local hangouts for, what I believe, every pigeon, sparrow and starling in Haines City, Florida. We had tried numerous ways of deterring the birds from roosting and nesting in these areas but without success.

I telephoned your office regarding the Quadblaster and after explaining the situation to a gentleman, he suggested the Super BirdXPeller Pro. He couldn't have been more customer friendly. He answered all of questions and concerns and made several suggestions. I must admit that I was a little skeptical about anything working but I decided to give it a try.

After installing the system, we saw immediate results. There were a few pigeons still hanging around but after some investigating, we found they had nests in the area. After the nests were cleared, they did not return. We have, also, discovered something better than a fake owl... a real hawk! Yes, we now have a hawk patrolling our property looking for free meals. I believe, with the combination of distress calls and the predatory bird sounds, the system has attracted this hawk. My Operations Manager actually witnessed the hawk taking down a pigeon in-flight.

The point of my letter is to thank you. Your product has rid us of our bird problems and my sanitation inspections have never looked better.

Thank you,

Greg R
