Yes sir I've bought 3 of these and they work fine our company is the talk of downtown for getting rid of the birds. But I have a problem I've had 3 speakers where the wires have came out of the speakers is there a way you can order more speakers. We've had lots of people asking where to get them for there business or home. I don't have a action picture but we have area by our larking area that had parking meters on the street and people would not put money in because the meters were white from the birds as was the side walk it was so white people said were glad you got rid of the white mud. Since then the City has came by and power washed the side walks and the meters and our grass is growing. We had 2 other areas 1 by a very up scale hall and another by a upscale club both gone.
