Subject: I'm impressed!

I put 2 pieces of Bird-X BirdNet over my 50' X 20' popcorn garden to prevent bird damage. I also put up a fence to exclude groundhogs. The net extends over the top of the fence.

I was surprised to see the groundhogs climb the metal fence to enter the garden, so I sewed the edges of the Bird-X to the top of the fence. The groundhog climbed the fence and the Bird-X to reach ears 6' off the ground! He could scrape the husk off the ears through the Bird-X, but no strand of the Bird-X failed, and the corn was undamaged! Next year, I may skip the fence and use net to protect the garden.

Have you had other reports of this quality of your product? Will it repel deer?

Oh, yes, it does also keep out the birds.

Thanks,

Roger
