I have a koi pond in my yard which seems to attract a big heron. He ate several of my fish and I didn't know what to do. I saw the "scarecrow" on the internet and thought I'd give it a try. I installed it and soon the heron came to eat more of my fish. I watched him for a long time as he inched towards my pond. As soon as he was in view of the motion-activated scarecrow, he was scared by the sprinkler and he took off. I have watched him several times (as he is very persistent), and it works every time.

I like the "scarecrow" because it doesn't hurt the animals and I'm sure it will keep raccoons out of my pond too.

This is a good product. It works, and is not too expensive. I am going to install it permanently in my yard.

Sincerely,

Betsy K
