Dear Aaron,

As Director of Buildings and Grounds, Pest Control is an on going problem, not only inside but also outside.

Out pigeon problem was a constant headache. Trapping was long, tedious and expensive. Shooting or poisoning were prohibited.

Results with the prowler owl were immediate, and we no longer have this serious problem. We have purchased two more, and they will (protect) our other buildings.

I would like to thank you for a very economical solution, for an expensive problem.

Thank you,

Robert A P
Director of Physical Plant
