Subject: hubby applying BirdX

Whew - what a mess we had with pigeons! There were two spots that were especially pleasing to these creatures..Both under the upstairs eaves, where two different roof lines meet.. It was almost impossible to get up there, so, as you can see in the attached photo my Hubby came up with the idea of putting the Bird Proof on a roller attached to a telescoping rod - leaning out the window and applying the Bird Proof that way.. The neighbors thought we had lost our minds - but boy did that stuff work!! Before Bird X we had at least 40 - 50 pigeons on our roof every day and night - now - ZERO !!!!!!!!!!!!!
THANK YOU!!!!!!!!!!!!!!!!!!!!!!!!!!!!
