RE: Terror-Eyes

Gentlemen:

We are dairymen in northern Wisconsin. We have an open commodity shed in which we store various feed stuffs for our dairy cattle such as pizza crusts, shell corn, cottonseed, etc. We had been having considerable problems with birds roosting, eating and messing in our commodities. We had tried unsuccessfully to scare them away with BB guns and other assorted gimmicks to no avail. I read about your product in Successful Farming magazine and we decided to give one of your large-Terror-Eyes a try. After all, what did we have to lose.

The Terror-Eye arrived in November and I am happy to report we have not had a single bird in the commodity shed since then. It is really unbelievable since we had virtually flocks of birds there before. They simply disappeared!!!

We just wanted to write and let you know how happy we are with your product. We have been recommending it to anyone who mentions a similiar problem. We would appreciate receiving any catalog you have available.

Sincerely,

Brandner
