Subject: Success!!

Hi, just wanted to say thanks. We purchased a Super Bird Expeller Pro recently from you, and have found the results to be fantastic. This summer we had a new EPDM roof put on our facility, approx. 130,000 sq. ft. Along with this new roof came a significant increase in sea gull activity, it was so bad I really had concerns about sending our people up there to do maintenance. You literally could not step anywhere there that wasn't covered with droppings. Your unit has been in service for about a month now, and we had cleaned a large area to use as a test site. There has been no gull activity whatsoever. This evening I witnessed no less than 200 gulls flying over our building and landing on the roof of one of our neighboring businesses. I went up onto ours, and not one bird was found. You've developed a very fine product, that so far has worked extremely well. I suspect it will continue to do so.

Many Thanks,
Brian P
