Chicago, Illinois 60607

Dear Gentlemen,

We have an antenna tower in the parking lot next to one of the entrances to our city building where Starlings roost. They make entering or exiting the building an adventure and parking out of the question. Over the years I have tried everything to keep these pests from roosting on this tower. When our City Manager showed me an ad for your new "Super Bird X Peller" I was not impressed. I had tried a similar noise maker years before which worked for a very short time. The birds became accustomed to the noise and then ignored it. Against my better judgment we ordered your product, and guess what? I am now a believer. It works. For the last two seasons it has kept the birds from roosting on the tower. The entrance to our building is clean and now we can use our parking lot.

Thanks again.

Sincerely,

James S'Y.
