comments: About four years ago we were having problems with woodpeckers drilling holes in our vacation house in Truckee, California. We learned about Irri-tape through the Real Goods Trading Corporation in Hopland, CA. We installed the Irri-tape four years ago, and have replaced it every year since and have had no more trouble with woodpeckers. Contrary to your claims, the Irri-tape does lose its effectiveness after a year or two in mountain weather. However it is not difficult to replace the strips we use, and we no longer have holes in our house! Thank you Irri-tape.
